

# Digital Photo Sharing

## What is digital photo sharing?

Digital photo sharing is broadly defined as the publishing and sharing of photos online. This can be done through websites dedicated specifically to photo sharing, such as Flickr or Photobucket, or through social media websites, such as Facebook or Twitter. There is no one-size-fits-all photo sharing website. Each varies in terms of editing capabilities, storage space, sharing, cost, file compatibility, and other options. Below are a few of the most popular digital photo sharing websites.

## Popular Digital Photo Sharing Websites

[www.Flickr.com](http://www.Flickr.com)

**Cost:** Free account available, pay to upgrade to Pro account

Flickr is a popular online photo and video sharing website hosted by Yahoo! Free accounts allow for 300MB/month uploads and 200 viewable images. Users will need to register through a free Yahoo! account. Mobile apps available for iOS, Android, and Windows Phone 7.
