What is it? VuFind is an open-source discovery interface for libraries. It provides users with an intuitive and productive experience using features such as:

- Fast, relevancy-based keyword search results;
- Spelling corrections and did-you-mean suggestions of alternate terms;
- Links to related resources;
- Faceted browsing to easily narrow down results; and
- Tools for saving and sharing searches and records

Cite this   Text this   Email this   Export Record   Add to Favorites

Your users deserve the best discovery experience possible. They expect the kind of experience they get with e-commerce. Cite-this, Text-this, Email-this, Export Record and Add to Favorites are all automatic with VuFind.

Advantages-
- Free to download, install and use— http://www.vufind.org
- Can include catalog records, locally cached journals, digital library items, digital repositories
- Modular, can be modified to fit individual needs
- Vibrant user community and development team providing support

See it in action-
Perhaps the best way to understand and appreciate the advantages of VuFind is to see how well it works:
