Awesome Apps for 6 to 8-year-olds

Ultimate Dinopedia **\$4.99**

From National Geographic, this app includes info on over 600 dinosaurs, and includes dino family trees. **Available for iPad**

Dinosaurs: American Museum of Natural History Collections **Free**

If one dinosaur app is just not enough for your little paleontologist, check out the AMNH Dinosaurs app. More than 1000 dino images from the museum's collection explain more about fossils, dinosaurs, and the people and histories behind these artifacts. **Available for iPhone, iPod Touch and iPad**

Toontastic **Free**

A joint creation of Stanford University's School of Education and Zeum, San Francisco's Children Museum, Toontastic lets kids unleash their creativity on cartoons and teaches them storytelling principles. The app provides sets, characters, and music, which kids can manipulate and capture. **Available for iPad**

AstroApp Space Shuttle Crew **Free**

Future space travelers will love this NASA app that lets them learn about every astronaut who's flown on a space shuttle. Kids can join in by choosing the Suit Me Up tab to see what they'd look like in a space suit! There's also a Space Station Crew app. **Available for iPhone, iPod Touch, and iPad.**

Bartleby's Book of Buttons Volume 1 **\$0.99** Volume 2 **\$2.99**

This interactive story about a man named Bartleby and his search for buttons is great for the curious reader who likes puzzles. Users have to push buttons on each page to help Bartleby move forward in his journey. **Available for iPad**

PopMath **\$0.99**

Kids can test their math skills (addition, subtraction, multiplication and division) by matching up bubbles that float through the screen: a bubble holding $6/2$ and a bubble showing 3, for example. After completing a level, players can move up or keep practicing the same level. **Available for iPhone, iPod Touch, iPad, Android**

Celeste SE **\$1.99**

Kids can use the camera on an Android device to map the location of bodies in our solar system: the sun, moon, and planets. Find out where they would be, even during the day, and learn more about the solar system. **Available for Android.**

50 States **Free**

For young geography students, this app is a great resource. Kids can learn facts about each state and test their knowledge with quizzes on state capitals, state flowers, and even a quiz that asks players to identify a state based on its shape and flag.

Available for Android. For iPhone/iPad users, try out the Stack the States app (\$0.99).
